

Supplementary material 2: PRISMA checklist

		Reporting Item	Page Number
Title			
Title	#1	Identify the report as a systematic review	Title page (1)
Abstract			
Abstract	#2	Report an abstract addressing each item in the PRISMA 2020 for Abstracts checklist	Not possible to include every item within 300 word limit. Included as much as possible. Abstract (1)
Introduction			
Background/rationale	#3	Describe the rationale for the review in the context of existing knowledge	Background section
Objectives	#4	Provide an explicit statement of the objective(s) or question(s) the review addresses	Last paragraph of Background section
Methods			
Eligibility criteria	#5	Specify the inclusion and exclusion criteria for the review and how studies were grouped for the syntheses	First paragraph of Methods section
Information sources	#6	Specify all databases, registers, websites, organisations, reference lists, and other sources searched or consulted to identify studies. Specify the date when each source was last searched or consulted	See Literature Search section of Methods; additional information in Supplementary material 1
Search strategy	#7	Present the full search strategies for all databases, registers, and websites, including any filters and limits used	Supplementary material 1
Selection process	#8	Specify the methods used to decide whether a study met the inclusion criteria of the review, including how many reviewers screened each record and each report retrieved, whether they worked independently, and, if applicable, details of automation tools used in the process	Supplementary material 1
Data collection process	#9	Specify the methods used to collect data from reports, including how many reviewers collected data from each report, whether they worked independently, any processes for obtaining or confirming data from study investigators, and, if applicable, details of automation tools used in the process	Supplementary material 1
Data items	#10a	List and define all outcomes for which data were sought. Specify whether all results that were compatible with each outcome domain in each study were sought (for example, for all measures, time points, analyses), and, if not, the methods used to decide which results to collect	See definition of high risk and data analysis sections of the Methods
Data items	#10b	List and define all other variables for which data were sought (such as participant and intervention characteristics, funding sources). Describe any assumptions made about any missing or unclear information	See Tables 1 and 2
Study risk of bias assessment	#11	Specify the methods used to assess risk of bias in the included studies, including details of the tool(s) used, how many reviewers assessed each study and whether they worked independently, and, if applicable, details of automation tools used in the process	Not included

Supplementary material 2: PRISMA checklist

		Reporting Item	Page Number
Effect measures	#12	Specify for each outcome the effect measure(s) (such as risk ratio, mean difference) used in the synthesis or presentation of results	See Table 2
Synthesis methods	#13a	Describe the processes used to decide which studies were eligible for each synthesis (such as tabulating the study intervention characteristics and comparing against the planned groups for each synthesis (item #5))	See Figure 1
Synthesis methods	#13b	Describe any methods required to prepare the data for presentation or synthesis, such as handling of missing summary statistics or data conversions	Not applicable
Synthesis methods	#13c	Describe any methods used to tabulate or visually display results of individual studies and syntheses	See Tables 1 and 2
Synthesis methods	#13d	Describe any methods used to synthesise results and provide a rationale for the choice(s). If meta-analysis was performed, describe the model(s), method(s) to identify the presence and extent of statistical heterogeneity, and software package(s) used	Not applicable
Synthesis methods	#13e	Describe any methods used to explore possible causes of heterogeneity among study results (such as subgroup analysis, meta-regression)	Not applicable
Synthesis methods	#13f	Describe any sensitivity analyses conducted to assess robustness of the synthesised results	Not applicable
Reporting bias assessment	#14	Describe any methods used to assess risk of bias due to missing results in a synthesis (arising from reporting biases)	Not applicable
Certainty assessment	#15	Describe any methods used to assess certainty (or confidence) in the body of evidence for an outcome	Not applicable
Results			
Study selection	#16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram (http://www.prisma-statement.org/PRISMAStatement/FlowDiagram)	See Figure 1
Study selection	#16b	Cite studies that might appear to meet the inclusion criteria, but which were excluded, and explain why they were excluded	See Supplementary material 1
Study characteristics	#17	Cite each included study and present its characteristics	See Table 1
Risk of bias in studies	#18	Present assessments of risk of bias for each included study	Not included
Results of individual studies	#19	For all outcomes, present for each study (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (such as confidence/credible interval), ideally using structured tables or plots	See Table 2
Results of syntheses	#20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies	See Results
Results of syntheses	#20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (such as confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect	See Results. No meta-analysis included
Results of syntheses	#20c	Present results of all investigations of possible causes of heterogeneity among study results	See Results

Supplementary material 2: PRISMA checklist

		Reporting Item	Page Number
Results of syntheses	#20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesised results	Not included
Risk of reporting biases in syntheses	#21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each synthesis assessed	Not included
Certainty of evidence	#22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed	Not included
Discussion			
Results in context	#23a	Provide a general interpretation of the results in the context of other evidence	See Discussion
Limitations of included studies	#23b	Discuss any limitations of the evidence included in the review	See Strengths and Limitations section
Limitations of the review methods	#23c	Discuss any limitations of the review processes used	See Strengths and Limitations section
Implications	#23d	Discuss implications of the results for practice, policy, and future research	See Discussion of clinical and policy implications section
Other information			
Registration and protocol	#24a	Provide registration information for the review, including register name and registration number, or state that the review was not registered	Not registered
Registration and protocol	#24b	Indicate where the review protocol can be accessed, or state that a protocol was not prepared	No review protocol
Registration and protocol	#24c	Describe and explain any amendments to information provided at registration or in the protocol	Not applicable
Support	#25	Describe sources of financial or non-financial support for the review, and the role of the funders or sponsors in the review	\$5000 funding paid to KD from BCNA. Funders played no role in the writing or editing process
Competing interests	#26	Declare any competing interests of review authors	Above noted in publication
Availability of data, code, and other materials	#27	Report which of the following are publicly available and where they can be found: template data collection forms; data extracted from included studies; data used for all analyses; analytic code; any other materials used in the review	Relevant data is included in publication and appendices
